Introduction to Onesys

Real growth

Onesys is the largest Business Partner of Sage Professional Services Division. Sage provides software solutions and support to over five million customers worldwide. Onesys are now one of the leading suppliers of timesheet, project and billing systems in the UK.

Software that performs

Onesys delivers complete distribution, manufacturing and service sector software systems with associated accounting, EIS, timesheet software and project systems to ensure a fully joined up solution. We have a dedicated team implementing these cost and time-saving business tools across all sectors.

Leading R&D with Sage

Onesys is actively engaged in ensuring that Coretime continues to meet the needs of our clients by feeding back new requirements to Sage on an ongoing basis and by providing additional tailor-made reports and Dashboard functionality.

High quality product and service

Our reputation is built on the success of our customers, the strength of our service and intelligent, integrated software. All products undergo stringent testing and Sage Ireland is ISO certified.

Onesys work to understand client requirements and ensure that we provide the highest quality service including professional implementation, training and responsive support.

After sales service and support

Our support team are Sage accredited technicians experienced in helping our clients resolve issues. They are readily available to provide friendly advice at the end of a phone. Our client feedback on support shows a high level of satisfaction with the ease of contact and desire to resolve queries immediately.

As well as support we offer high quality on-site training in the comfort, convenience and familiarity of your own premises. We also offer web-based learning and support so you can always be assured of a quick and convenient response.

Sage solutions for every business

With each product you receive the best software, training and support we offer - from Accounting, Payroll and CRM to Distribution, Retail, Construction, Manufacturing, Professionals and HR.

Sage Coretime

Sage Coretime provides the highest quality time recording and project management software for the discerning professional company. An innovative solution to the age-old problem of recording time and expenses on a project-by-project basis, it maximises Return on Investment (R.O.I.). Typically, existing users have indicated a R.O.I. within months or even weeks of purchase.

Sage Coretime provides a real-time solution for time based professionals who wish to maximise resource productivity, achieve maximum recovery and ensure that individual projects achieve optimal profitability.

It provides time recording staff with an intuitive, easy to use time and expense entry screen. Management have a comprehensive project review and reporting module, as well as a fully integrated debtors ledger to assist them running their company more efficiently. More than just time recording, or corporate management, it uniquely triggers users towards optimal productivity, recovery and profitability.

In the ten years since its launch, Sage Coretime has grown to become one of the most comprehensive time, billing and project management products available worldwide.

The company enlisted the expertise of a broad range of professionals, each adding valuable functionality to the product. It has evolved over the last eight years with the help of these catalyst clients whose invaluable input has raised the analysis and reporting functionality of the program.

Enabling users to record time and expenses, plus manage projects off site, this product has proved to be very popular with existing and new customers alike.

Sage Coretime now has over 6,000 users worldwide and is now installed in a wide variety of professional companies including:

| | |
|----------------------|-----------------------|
| Consulting Engineers | Financial Services |
| Architects | PR & Event Management |
| Accountants | Advertising |
| General Consultants | Actuarial Services |
| Software Developers | Oil Exploration |
| Web Development | Translation Services |

In a nutshell, any business in the business of selling time or project management should be using Sage Coretime.

Features within Sage Coretime allow managers to monitor performance on a stage-by-stage basis against budgets.
